

Performance you can count on.

When you put your life on the line, keeping your head in the job is critical. That means that distractions like poor-performing, uncomfortable clothing are something you just can't afford.

No wonder so many Police Forces, Fire Fighters, SWAT Teams and Military Personnel choose garments by Tac Wear.

Tac Wear clothing fits. It performs. And it lasts. It does its job – and it helps you do yours.

The ultimate in performance apparel

In the performance clothing industry, bold claims are a dime a dozen. But in far too many cases, the facts – and the garments – don't back those claims up.

At Tac Wear, the facts are on our side. We use only the most advanced, best-performing technical fabrics. We design from real-world experience, with input from some of the world's most demanding customers. And we manufacture our garments to the highest technical standards right here in North America. None of our competitors can say the same.

**The best guarantee
you'll never use.**

It's easy to stand behind your products when you make the best. If any Tac Wear garment fails to perform due to manufacturing defects, we will repair or replace it at no charge. Interestingly, to date, not a single Tac Wear customer has returned one of our products to take advantage of this guarantee.

What's the buzz on Tac Wear?

Don't take it from us. Here's what Tac Wear customers in the Law Enforcement, EMS, Military Units and related organizations are saying about our products.

Nicole, Fort Worth, Texas

Dear Tac Wear,

I just wanted to follow up on my previous messages to you, the CoolMax® Top is GREAT. I find it really comfortable and cooler than wearing my usual cotton undershirt. Thanks a bunch for letting me test it out. ...

Scott, Toronto, Ontario

Dear Tac Wear,

WHAT AN AMAZING PIECE OF CLOTHING! Everyone likes it, wants it and wanted to know where to get one. I can't go on enough about the superiority of Tac Wear vs. cotton and the reflective letter is OUTSTANDING...

Graham and Geri Morley, Around The World Travellers

Dear Team Tac Wear,

People had warned us that it was stiflingly hot during the day and cool at night in central Turkey and we thought we were prepared but the weather was more extreme than we expected. Kudos again to TAC WEAR, your Coolmax® Extreme clothing was a lifesaver. It performed better than any clothing we have ever worn; cool and dry in the heat and comfortable in the cold.

CMPK001 - Uniform Polo

Sizes: S, M, L, XL, XXL, 3XL

DN8P001 - EMS Pant

Our garments also stay smelling fresh, even after long hours of duty in hot, humid conditions, thanks to the freshFX™ component. And as a bonus, a superior weave pattern makes our garments almost impervious to damage from contact with Velcro and other abrasive materials, so they stay looking good longer.

Coolmax® Extreme with freshFX™

Everyone knows Coolmax®, the industry-leading moisture-wicking fiber made by Invista®. What most people don't know is that Coolmax® clothing comes in three distinct performance grades: Everyday, Active and Extreme.

For our garments, Tac Wear uses a proprietary fabric proven by Invista to exceed their Extreme performance standard. Our fabric also includes an invisible silver fiber – that's the freshFX™ component – that's anti-microbial, anti-bacterial and anti-odor.

What all this means is that the performance of our Coolmax Extreme® with freshFX™ garments is integral to the fabric itself. It literally can't wash out, so our garments continue to deliver tremendous wicking performance even after years of wear.

NOMEX®

For protection against extreme heat and flame, there's no substitute for NOMEX® by Dupont™.

NOMEX® doesn't burn, melt or drip, and it puts a protective barrier between the danger and the wearer. NOMEX® is also lightweight, breathable and comfortable to wear for prolonged periods.

All of Tac Wear's thermal protection garments are created using an advanced, soft-knit NOMEX® fabric that's stretchy, durable, easy-to-clean and soft to the touch. They're also constructed using NOMEX® thread, to ensure they stay together when protection is needed most. Zippered garments feature NOMEX® taped brass and Vislon® zippers from YKK® for additional protection.

Fabrics

Ever wonder why some supposed technical garments just don't do the job over the long haul? It's simple. The performance of treated polyester – the fabric of choice for most of our competitors – begins to break down after the very first wearing. Its wicking ability literally washes out and the cloth doesn't have what it takes to stand up to hard use.

Tac Wear uses only the best fabrics for every application. We are proud to be partners with Dupont™ and Invista®, the leaders in technical fibers.

Design

Other companies use fashion experts to design their clothes. The result? Garments that may look good in the catalogue but don't work well in the field.

Tac Wear's apparel is designed, tested and refined based on real-world experience. You can see the difference in a host of design details, like premium quality zippers and, in compression garments, flat-lock stitching that creates a seamless environment to eliminate pressure points.

Manufacturing

Tac Wear products are created exclusively by experienced North American workers in our plant located in Toronto, Canada. Our manufacturing facility is ISO 9001 registered, an internationally recognized credential that assures excellent quality.

Thermolite®

When it's cold, what your people need is warmth without weight or bulk. Nothing delivers that combination of attributes quite like Thermolite® by Invista®.

Thermolite® is engineered with tiny hollow-core fibers that trap air for excellent insulation. Wet or dry, it provides greater warmth than any other fabric, and is almost 3 times warmer than treated polyester.

These fibers also wick moisture away from the skin to help you stay warm and comfortable. Pound for pound, Thermolite® dries faster than any other fabric, too.

Tac Wear offers a full line of Thermolite® garments for those situations in which extreme thermal protection is required.
